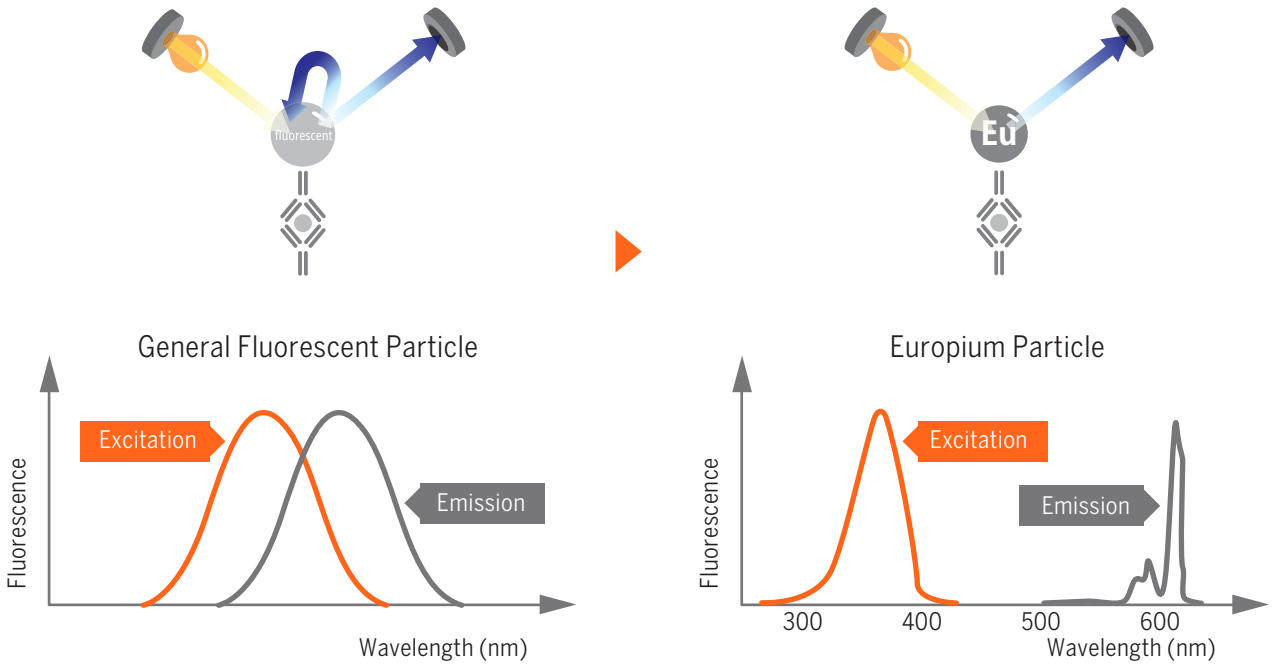
CANINE/FELINE

Vcheck V200 & V2400

Fluorescent Immunoassay Analyzers for Quantitative In-clinic Results

Technology

With **Europium**, the stimulating wavelength and emitting wavelength do not overlap, ensuring you receive precise diagnostics for improved care.



Overlapping Wavelength

Non-overlapping Wavelength

Vcheck V200

Veterinary Clinics | Hospitals

1 Test at a Time

Dimensions 7.8" wide x 9.4" deep x 8" high

7" Color Touch Screen Display

HLV v2.6(PCD-01) / POCT1-A Connectivity

Built-in Printer

V200 Video

Vcheck V2400

Multi Doctor Practices | Laboratory

24 Tests at Once / 70 Tests per Hour

Dimensions 20" wide x 22" deep x 11.6" high

10" Color Touch Screen Display

HLV v2.6(PCD-01) / POCT1-A Connectivity

Built-in Printer

V2400 Video

Quantitative Tests Available on Vcheck Analyzer

In-House Quantitative Diagnosis Possible

13 Biomarkers Available + More Coming Soon!

Inflammatory
CRP, SAA

Pancreatitis
cPL, fPL

Hormone
Cortisol, T4, TSH
Progesterone

Coagulation
D-dimer

Cardiac
NT-proBNP (Canine, Feline)
TnI (Canine, Feline)

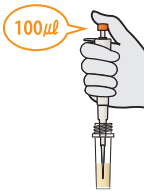
Clinical Application

Compact and convenient analyzer to expand your in-clinic testing and reduce testing turnaround time.

- Regular Check-Up
- Emergency Check-Up
- Pre Anesthetic Workup
- Patient Prognosis
- Combined Diagnosis

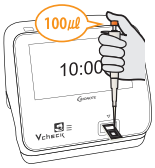
*Pancreatitis: CRP + cPL
*Heart Disease: NT-proBNP + TnI

3-Step Test Proceduce



1. Dilute the sample

2. Add diluted sample into a test device



3. Check the test result

Test Reagents and Results

*Soon to be availabe in North America
